

Yeah, so I was looking... This thing is being recorded, okay. Yeah. Oh, yeah. I was just looking to get a website, like, punched up, looking more professional, that kind of thing. I, like, just designed that myself quickly, so all the information that you need should already be there. I just want it looking better. Okay. That was done by you? Sorry, what? Yeah, the website is done by you? Yes. Well, great. You did a good job. I tried my best. It's for a cancer hospital. So I want it looking better and more professional, but all the information that you would need is on there. Okay. So the fact is the website is kind of done. Okay. Let me do the screen sharing. Hold on. Okay. Can you see the screen? Okay, can you see the screen? Okay, let's see, yeah. Okay, all right. So the fact is, this is the website. Okay, your website doesn't have any logo. So- Yeah, so the company itself has a logo. So if you can replicate their logo and maybe like modernize it a little bit, that would be great. I can send you the logo. You can send me the logo, but we will, because I need a logo for the colors and everything and the fonts, because for designing a good website, we actually follow the logo, you know, the color of the logo's colors and what the fonts. Yeah, so let me, so honestly, because the logo is kind of old, I don't think the font of the website should like follow the logo per se. Yeah, but we can follow the color as well, right? But the color, the colors work. I just want it looking very modern and professional. Like we work with Stanford Medical School and stuff. So I want it looking very, very professional. Sure. So you have to pay. Yeah, you have a look at our sample website, right? We have sent you a couple of them. Yeah, so I send you the three I kind of like from what you did. Let me send you the logo. Oh, one second. Okay. So it was on Apple, right? Yeah, that's the text. That's kind of the logo. Okay, so yeah, okay, that's a good one. We can use that. We can use the color scheme for the website. Yeah, like just maybe make it look a little more, you know, modern kind of. Yeah, sure. Why not? First thing. Okay, all right.

Okay, yeah, we'll manage that no problem. Okay, so moreover, you have sent us a couple, like three websites you like them, right? Yeah, so I like the three that you did. These are kind of like, let me send you, I like this website. I'll send it to you on here. This is a medical website. Oh yeah, okay. Let me look. Okay. Okay, okay, this is the one right. All right. We can build something like Excel. Even while we can give it a more nice looking touch for the modern vibe, you know? Yeah, like this is also good. Let me send it to you. Okay. Oh, one more question for you. So there are like one, two, three, four, five, six. Yeah, six pages on the website, right? So all are in the menu, right? Huh? Oh, there's all the sub menus right there. Okay, client portal. Okay, let me have a look on that one. Okay, the fact is what the contents will remain the same, the design will change, right? Yeah. That's a fact. Okay, so all the features are included in the website right now? Yes. Everything is included on the website right now. Okay. So you don't need to like come up with any other like information or writing. it's just purely like design and kind of like organize and then the logo. Yeah, okay. Guys, oh, okay. Seems like it's organizing the website. That's it. Yeah, the look, the organization and like making sure the mobile website also looks good. Yeah, obviously. So yeah, obviously the website will gonna load fast and it will be mobile responsive as well. Yes, yes. So, and then the logo. That's about the situation. What about the search engine optimization for your website? That is not as important. I think there's something that already comes up with it already. All right. So we don't have to worry about that as much. Okay. Okay. So yeah, that's it. Oh, okay. One more last question. So what's the time frame? Oh, when you could, if you could do it as soon as possible, that would be great. As soon as possible. Yeah. Okay. Like, okay, like, three to four, three to five days, I guess.

Not more than that. That would be awesome. Yeah. Because I'm, I'm on a budget and how many hours do you think this would take? Because I'm trying to like keep this cost to a minimal because this is kind of something I could do myself, but I'm just looking to get like, I'm just busy at the moment. I guess, it won't cross the amount of like \$300. Yes. Okay, that works. That works, right? So if you want, we can do it like hourly or we can do it like it's a fixed budget for 300. What do you think? I think let's just do a fixed amount. Fix amount would be great. Fix amount would be great. And if I don't like something, you can just kind of edit it and go from there, you know? Okay. So yeah. So it's about the designing the pages, right? Nothing else. Yeah. Design and then the logo. Okay. For the design, we can go for it. All right. Yeah. Design, organization, logo. Yeah. All right. Probably got it here. Okay, one more thing. So can you go to the Upwork and change the term to like a fixed budget from hourly rate? Sorry, what? Okay, so since we are doing in a fixed budget, so you can go to the Upwork and change the terms to like a fixed budget instead of the hourly rate, okay? Okay, yeah, yeah, yeah. I think there's a new proposal for that, that's it. So how do I, oh, so I just go to the jobs. Yeah, you can do the screen sharing and let me show you. Okay. This button on the bottom. One second. Your screen. Okay, does this work. It says host has disabled screen sharing. Oh, OK. Hold on. Hold on. Yeah, now try it. No, I'm not sure that was still. Yeah, now you can try it. Hold on. Yeah, you can see the green button on the bottom. You can share your screen. That's it. OK, let me just hold on. Okay, yeah. Can you do that? What happened? Yeah, for some reason it's not working. Do I just go to the job post and edit it to a fixed price? Yeah, that's it. Okay, hold on.

Okay, one more thing. Just send us the what? We will send you an email through Upwork. send us an invitation for the collaboration for the Wix website. All right? Okay, wait. So hold on. View job post. I'll do edit posting and then I'll do budget. So I'm here under budget. Do I change that? or what do I change? Yeah, there will be option like for hourly fixed amount. I hope you find that. Okay, so it says from 20 to 40 an hour. Yeah, so you can just change it to like the fixed budget. Yeah. Okay, hold on, edit budget. Okay, so if that's like a no problem, we can keep hourly rate, we won't cross the amount to more than 200. All right. Okay, cool. Yeah, that works too. Okay, let's do that. And then like, if I'm not, you know, if some things need to be edited or the colors or whatever after you're done, like you would just like fine tune it until we get it to the right spot. I'm not gonna be like crazy demanding or anything, but just to make sure we get it. We'll do all the fine tunings for you at the end of our completion. Yeah, okay, that works. Oh, okay. So yeah, can you send us an invitation for the work so we can get started with that? Yeah, I just saw it. Um, savings. We didn't. Okay. So, how do I do a higher freelancer. I have a freelancer. Hold on. Oh, here I got it to the fixed price. Okay, yeah. So, so it's better to go for the upper we can see okay sorry how about the rate so we can just track it track us down so we can get those screenshots what are doing every hour. So I guess I pay by hour, \$20 an hour. Yeah. And pay the weekly limit and then start date is today. So is there a way to just do a limit on the week? Like obviously. Yeah, you can change that later on. You can limit it a week later on after the, well, in the middle of the work if you want. Okay, so we just do the fixed price then? Yeah, we can go for that too as well. Yeah, let's just do that. Cause then, and then logo. So you said you do it in three days kind of? Yeah, three to five days. So what should the due date be? Yeah, you can limit it to like, yes. So Sunday. So yeah, if you just check the part of the fixed price, there is an option like maybe so weekly. Okay, so Sunday. Yeah, you can choose any of them.

Okay, I'll do a deposit of 100. Is that okay? And then I'll pay the rest or 150 and then I'll give you the other half on completion. Yeah, sure. No problem. No problem. Okay. I'm not sure if this is a surprise. Yeah. So what you're looking for. I'm just putting in my address here. Media. Okay. Did work. Okay, for some reason it's saying the state isn't working all along. United States. Okay, for some reason it's saying the state like isn't working. I don't know why. Hold on, let me just reload this. California. Let's go. Okay. Now this is working. Hold on. Yeah, so if you could make the logo a little more modern, you know, with the fonts. The logo? Yeah. Oh, okay. Okay, we will try to make it more better. Yeah, like this, you know. Yeah. And then, yeah, you can send me like a draft kind of, and if I don't like it, I can put you in there. The fact is that color scheme should be like on the blue, right? Yeah, like blue, red, black, purple. Like I like the color scheme kind of on this blue, red, black or yellow like that. Okay. I can write it in the- So the logo tagline is like, it's all about life, right? Yeah. That's a tagline. Oh, right. Yeah. I kind of like also having like big pictures. Like, I don't know if you can get bigger pictures, but I really like these three websites you did, like the Raven and the Bennett. Yeah. Like those are cool. Dylan Ross. So yeah, we will try to, well, what? Yeah, like some good pictures, like some medical pictures, you know? So yeah, we will use our stock photos from our end. No problem. Yeah, yeah, yeah, yeah. Okay. And yeah, I think some of the stock photos I used are good, but if you find better, like I'm into that. And then you're gonna do a draft, right? You're not gonna erase the website. And then if I like the draft, we'll implement the draft as the main website, right? Okay. So yeah, we can create pages from the backend so you can just take the pages, what I've done so far. Yeah, so you don't erase the whole, like let's say I don't have what you did. Obviously, we will publish the work out to the website. Yeah, so first you'll show me a draft and then if I like it, we'll implement it as the real website.

Yeah, for sure. Okay. Okay. Hold on, let me just go back to the payment here. Okay. Okay. I'm bad in the exam. We have received that. Okay, you got it? Yeah, we got that. All right. Okay, we have sent you an email, right? So can you send us an invitation for the Wix on the email? Yeah, let me just hold on. So you have accepted the offer. Okay. All right, yeah. Payment received. Okay. Upwork notification. Okay. Offer. Okay, yeah. There is nothing to do from your end right now. So it's all right. So we will start the work as soon as possible. So all we need the weeks of website collaboration to get started. Okay. to get started. Okay, so where do I give you like my password and okay and no need to like give any password or anything. Yes, you can send you can see an email on the upward message. Can you see that? Okay, hold on. It's a creative medallion 281 at gmail.com. Hold on. So where do I, where do I put this? Okay, yeah. So have you got the email? Yeah, it said, yeah. Pay now blah blah blah. Oh no. So uh okay let me send you the email again hold on. Okay take again. On the messages. Oh on the messages. Okay one second. And what's your name? Okay, yeah, it's Mina has you can see that. Yeah. Men has all okay my name is Jamie. Okay. Okay. So with that, what do you want me to do with that. Okay, so copy the mail. Okay, then go to weeks. Go to settings. Okay, okay. Yeah, go to settings. Okay, hold on. Okay, Kennedy screen sharing so we can show you that. that? Yeah, let me just log in one second. Okay, because to get a work with everything, we need the admin access, you know? Yeah. So do you want me to go to settings? To do it, go to settings. Yeah, you can go to the settings. Okay, account settings and then what? You can see there's an option for invite or add a user. Okay. Partner dashboard. Maybe that's not it. Let me do the screen sharing with you. Hold on. Share screen. Desktop share. So you can see the settings, you can see the rules and permission. Yeah, hold on. Hold on. Let me see. General screen recording. Okay.
